

excel test prep excel test prep

"I believe the Excel Test course was a huge factor in my passing of this test and would recommend this course to anyone taking the PE exam."

Jaime, PE Mechanical

FE-CBT & PE Prep Courses

"I was a student of your EIT program. After taking this test numerous times, I was on the verge of giving up until I signed up for your course. I passed the exam on the very next attempt."

- Fernando, EIT/FE

FAQ

Is this course for me? Our course is designed for students who have been out of school for a while. We realize that many of our students may not have practiced the topics covered on the exam since college. Our focus is to give you a concise, intensive, and structured review of the important topics on the exam, and we use our workshop sessions to ensure that you get the practice applying your skills in a timed problem solving environment.

Who teaches the classes? Our instructors come from the industry and academia, and are highly qualified in their specialized fields. Each course is taught by several instructors who have taught the EIT/PE courses for many years at various companies, including British Petroleum (BP), Bechtel, Fluor, Surrine, Lummus, Texas Instruments, Foster Wheeler, Utility Engineering, City of Austin Electric Utility Department and the Department of Transportation of Texas, Virginia, and Louisiana.

How are Excel Test Courses different from other courses? The course coordinator has been teaching the EIT/PE course for over 30 years, and is very well versed with the format of the exam and what it takes to pass it. Our course is not a college course, which is designed to cover mostly theory. Our comprehensive course is focused only on the exam and helping students pass. Along with the course topics, we teach many tips, techniques, and shortcuts to solve problems and save time. After going through the class, students are not only able to solve the problems but also solve them quickly. As a result of the quality of our courses, we are able to offer the Guarantee of Passing.

How does the Guarantee of Passing work? If you attend every class (including mock exams) and still don't pass your exam, you can repeat the next session of the course absolutely FREE. To get the guarantee for the FE - CBT, you must take the actual exam 60 days after the completion of the course. For the PE exam, the actual exam must be taken within 9 months after the completion of the course. The free repeat is limited to only one time, and it must be used in the next course offered after the results of the actual examination have come in. Subsequent repeats within 18 months will be at 50% of the regular fee. No course is guaranteed to be offered at the previous location or every time the actual exam is given.

Does the Guarantee of Passing still apply if I miss a class? All classes in our course need to be attended for the Guarantee of Passing. This is also for your benefit, as attending all classes will increase your chances of passing. However, we understand that sometimes unavoidable circumstances come up and you are unable to attend a particular class. For that reason, we are flexible in allowing you to miss up to one topic session (day) per course, and the guarantee will still apply. We will also allow you to make-up 4 missed classes for free in parallel courses running in other cities around the country, if you are willing to travel.

Which FE Exams do you prepare for? Excel Test offers FE-CBT courses in Civil, Mechanical, and Other Disciplines. Engineers preparing for exams other than Civil and Mechanical are advised to take the Other Disciplines course and exam.

When should I start preparing for the PE exams? You are not eligible to take the PE until you pass the Fundamentals (FE) exam. Students usually have at least four years of experience in their discipline before taking the PE. Most licensing boards require that your work experience be under a licensed professional engineer's supervision.

Will the course prepare me enough for my afternoon PE depth exam for PE Civil/PE Mechanical? The review course covers concepts suited for the breadth (AM) exam preparation as well as in-depth problem solving that focuses on the depth (PM) examinations. However, it will be helpful for you to spend some additional time reviewing topics and material related to the specific PM depth that you choose.

The FE-Computer Based Test or FE-CBT (formerly the EIT) and PE are exams that are required in order to become a licensed engineer. Both exams are developed, administered and scored by the National Council of Examiners for Engineering and Surveying (NCEES). Before registering for an upcoming exam, review your state's approval and registration process by visiting your state licensing board's website.

"I took the PE exam in APR 2016 and passed. Preparing for FE and PE exams were challenging for me since I graduated back in 1980s. I couldn't have done this without your prep materials. Dr. Israni's videos along with others were great."

- Alex (FE and PE Mechanical)

"I just came from abroad, and I had no experience with how tests are in the USA. I finished college back in 1994. This course helped me review my 15 year old knowledge. I passed the EIT on my first attempt. I only did what I was told to do by the teaching staff of Excel Test."

- Atif (EIT/FE)

Guarantee of Passing

We are so sure of the quality of our course, we **GUARANTEE** that if you attend every class, **YOU WILL PASS THE EXAM**. If you don't, then you can take the next course absolutely free!

Top 10 Reasons To Choose Excel Test

1. Highly qualified, dynamic teachers who have helped thousands of students pass the exams.
2. Our materials are based off real exams, not simulated questions.
3. Our courses are comprehensive, preparing you for both the morning/breadth and afternoon/depth.
4. Our courses focus on solving problems like those on the exam.
5. More teaching hours than any other course around.
6. Our courses have a Passing Guarantee!
7. We study the EIT/FE and PE exams to stay current on any changes.
8. You get a group discount when you take the course with your friends.
9. We offer great office support with staff members who are dedicated to helping you reach your goals.
10. We have served California for years and are one of the fastest growing test preparation companies in the nation.

EIT/FE-CBT COURSES

“With your support, materials and guidance, I passed the PE Civil examination. The PE Civil prep course, materials, and workshops are excellent. I believe your PE Civil prep course and materials is the best PE course in the market.”

- **Jagdish** (PE Civil)

“The course as right on and prepared me for the types of questions that were on the exam. I appreciate the fact that the class is specifically geared to passing the exam and not a college lecture re-viewing information that will not be covered on the exam. I don’t think there is anything I would change in the course material.”

- **Randy** (PE Civil)

“The FE/EIT isn’t about how well you know the material, it’s about how quickly you can solve the test problems. I wasn’t prepare to solve the problems after I took the PPI course, I was after the Excel Test course.”

- **Skot** (FE/EIT)

“The classes were amazing and fundamental for my success as a first time PE exam taker.”

- **Adelaide** (PE Civil)

COURSE POLICIES

What is your refund policy? If you drop the course at least one week before the start date, the fee will be fully refunded. After that date, refunds are given on a pro-rata basis up to two weeks less \$250 administrative fee. In order to obtain a refund, there must be a written request for a refund and the return of all materials in an undamaged and unmarked condition. Otherwise the fee is an additional \$250 for the course materials. There will be no refund for the classes missed or attended prior to our receipt of the written request, which must be sent only by email to info@exceltest.com. The free repeat has no cash value. No refund will be given for not repeating the course. It is not transferable to any other course or person.

Course Offering Policy Due to the limited number of engineers taking these exams, we may not offer every course in every location. If a course does not meet the minimum enrollment requirement by the early registration deadline, it may be cancelled and any fees paid will be refunded.

For additional information on the exact location and schedules of our courses, please call our Main Office at 800-913-PREP (7737). Excel Test reserves the right to change the schedule and location due to unavoidable circumstances.
